

This listing of claims replaces all prior versions and listings of claims in the application:

1. (CANCELED)

2.(PREVIOUSLY PRESENTED) The cabinet according to claim 23, wherein the optical components include a light projector assembly for generating images, a screen for viewing the images, and at least one mirror for directing the images generated by the projector assembly to the screen.

3. (CANCELED)

4. (PREVIOUSLY PRESENTED) The cabinet according to claim 23, wherein the optical components include a mirror, and the locating features for the mirror include a pocket and at least one slot, the pocket and the at least one slot defining a reference plane for the mirror.

5. (CANCELED)

6. (CANCELED)

7. (PREVIOUSLY PRESENTED) The cabinet according to claim 23, wherein the optical components include a light projector assembly and the locating features for the light projector assembly include a vertical wall.

8. (PREVIOUSLY PRESENTED) The cabinet according to claim 23, wherein the optical components include a mirror and the locating features for the mirror include two pockets that define a reference plane for the mirror.

9. (CANCELED)

10. (CANCELED)

11. (CANCELED)

12. (PREVIOUSLY PRESENTED) The cabinet according to claim 23, wherein the enclosure is molded from plastic.

13. (PREVIOUSLY PRESENTED) The cabinet according to claim 23, wherein the locating means minimize tolerance stacks for mounting the components.

14. (CURRENTLY AMENDED) A cabinet for a projection television system, the projection television system having a plurality of optical components, the cabinet comprising:

a one-piece, unitarily molded enclosure for mounting the components; and
locating features unitarily molded with the enclosure which directly engage the components and mechanically align the components with one another wherein the components include a screen and the locating features include at least one surface formed by a boss.

15. (PREVIOUSLY PRESENTED) The cabinet according to claim 14, wherein the components include a mirror and the locating features include a pocket and at least one slot that define a reference plane for the mirror.

16. (PREVIOUSLY PRESENTED) The cabinet according to claim 15, wherein the components include a second mirror and the locating features include two pockets that define

a reference plane for the second mirror.

17. (PREVIOUSLY PRESENTED) The cabinet according to claim 14, wherein the components include a screen and the locating features include a pocket that defines a reference plane for the screen.

18. (CANCELED)

19. (PREVIOUSLY PRESENTED) The cabinet according to claim 14, wherein the components include a light projector assembly and the locating features include a vertical wall that defines a reference surface for the light projector assembly.

20. (PREVIOUSLY PRESENTED) The cabinet according to claim 14, wherein the enclosure is molded from plastic and the locating features minimize tolerance stacks for mounting the components.

21. (PREVIOUSLY PRESENTED) The cabinet according to claim 23, wherein the optical components include a screen and the locating features for the screen include a pocket that defines a reference plane for the screen.

22. (CANCELED)

23. (CURRENTLY AMENDED) A cabinet for a projection television system, the projection television system having a plurality of optical components, the cabinet comprising a one-
